

Efficient Solutions for Descaling HASTECC Engineering Inc.

Introduction

HASTECC Engineering are specialists in descaling and offer a full complement of descaling related products for the steel and forging industries.

- **increase profitability**
 - **improve product quality**
 - **maximize system availability**
- due to our innovative Radial Pump design*

HASTECC utilizes the latest in descaling technology resulting in a high performance descale system.

- **simple durable technology**
 - **most reliable**
 - **easy to operate and service**
 - **low operating costs**
 - **long life**
- ⇒ **lowest Total Cost of Ownership**

All HASTECC descale systems feature HYDROWATT Radial Piston Pumps which are widely recognized for their reliability, simple design and ease of service.

Complete engineering support is provided by HASTECC to integrate HASTECC products into descale systems.

HASTECC has an extensive installed base in North America. Major customers include ArcelorMittal, Gerdau and Nucor Steel among others. A complete reference list is available on request.

All HASTECC products and systems are serviced by an industry leading warrantee and come with full technical and field support. A complete spare parts inventory is maintained by HASTECC for all HASTECC products sold.

HASTECC Products

- ☑ **Complete Descale Systems**
- ☑ **Descale Pump Stations**
- ☑ **Descale Valves**
- ☑ **Descale Headers and Spray Chambers**
- ☑ **Automated Descaling Machines for the Forging Industry**
- ☑ **Water Conditioning Equipment, Scale Collection and Electrical Control Equipment**

Please call **1-905-687-9194** or visit **www.hastec.com** for product or system information.
