

VIGOT Industrietechnik

Proximity to the customer through continuity & expansion

VIGOT makes connections: more than 150 years after the company based in Bremen was founded, its motto and value proposition are more timely than ever. Especially since the proven MAXIMALL® hose system has recently been expanded into industry-specific ranges. The head office in Bremen was considerably expanded in 2017. With operating establishments in Mainz (Rhine-Main) and now also in Mülheim/Ruhr (Rhine-Ruhr), VIGOT has strengthened its presence across Germany.

VIGOT is part of the SCHAUBURG INTERNATIONAL group of companies and one of the leading assemblers and manufacturers of ready to install hoses in Germany. All innovations and changes notwithstanding, the company naturally remains committed to the uncompromising quality that has always defined VIGOT.

This is also reflected by the fact that VIGOT is approved by various classification organisations as an authorised assembler of individual products and holds all relevant certificates. Quality assurance is comprehensive and consistent.

VIGOT is blazing new trails in the development of industry-specific hose systems with the MAXIMALL® brand. Segmentation within the brand allows the company to offer complete solutions from one source for various industries, effectively boosting the economic efficiency of the industry partners. Currently the brand includes hose systems in four segments: MAXIMALL® wind power for power engineering, the MAXIMALL® cooling water hose for metallurgy, the proven MAXIMALL® F88 fire protection hose for railway engineering and the hidden champion MAXIMALL® S 2000 for defence

technology. The market-driven and technically mature systems are convincing from an economical, ecological and safety engineering perspective. Industry-specific brand-name solutions for additional segments will be added over time.

Service has recently been selectively optimised. This is not only reflected in the expanded fleet for mobile hose inspection on site. The introduction of the e-catalogue on the Internet, the digital hose register for the documentation of inspection results and the relaunch of the ERP system also express a company philosophy that makes customer proximity - experienced in practice - the highest priority, also and especially in view of the industry's digital transformation.

Innovative product development, industry-specific solutions, an extended range of services and an expanded local presence: those are the key elements of an integrated expansion strategy that benefits customers in various industrial sectors directly. They include customers in the automotive, railway engineering, shipbuilding, aviation and aerospace, chemicals, and food industry as well as those in the steel industry and defence technology. VIGOT works closely with other companies in the SCHAUBURG INTERNATIONAL group. Synergies are actively utilised in the interest of customers.

Customer proximity through expansion and continuity: VIGOT is accompanying its industry partners on the way into the 21st century.
