

Partnership in alloys

Copper based master alloys

Copper

Copper-Aluminium 10%, 50%, 60%, 70%, 75%, 80%
Copper-Aluminium-Boron
Copper-Antimony 50%
Copper-Arsenic 20%, 30%
Copper-Bismuth 25%
Copper-Boron 2%
Copper-Calcium 5%, 10%
Copper-Cerium(MM) 10%
Copper-Chromium 5%, 10%
Copper-Cobalt 10%, 15%, 20%, 50%
Copper-Iron 10%, 15%, 20%, 25%, 30%, 50%
Copper-Iron-Aluminium
Copper-Lithium 2%
Copper-Magnesium 10%, 15%, 20%, 35%, 40%, 50%
Copper-Manganese 20%, 30%, 50%

Copper-Manganese-Cobalt
Copper-Manganese-Iron
Copper-Manganese-Nickel
Copper-Manganese-Phosphorus
Copper-Manganese-Silicon
Copper-Nickel / Cupro Nickel (various compositions)
Copper-Phosphorus 8%, 10%, 15%
Copper-Silicon 10%, 15%, 20%, 30%
Copper-Silver 10%, 25%, 30%
Copper-Tellurium 50%, 82%
Copper-Tin (various compositions)
Copper-Titanium 30%, 50%
Copper-Vanadium 1%
Copper-Zinc (various compositions)
Copper-Zirconium 10%, 33%, 50%

Physical form: ingots, waffle plates, lumps, powder.
